

Tran Anh Kiet (Mr.)

Automation Tester

HIGHLIGHTS

- **Experience in software testing, both manual and automated testing**
 - 3 years of experience in automation testing and building test automation frameworks
 - 1 year of experience in running manual test cases
 - Experience/ knowledge about SDLC - Software Development Life Cycle
 - Familiar with the Agile method: Scrum
 - Experience working with international teams: USA, AUS, Thai

TECHNICAL SKILLS

- **Automation testing skills:**
 - Experience working with a programming language: Java, Python
 - Experience working in automation testing frameworks: TestNG, Robot Framework, Maven
 - Experience working with automation testing tools: Selenium, Test Modeler, Tosca
 - Experience working in design patterns: Page Object Model, Factory Pattern, Pattern Object
 - Experience working in API testing: Postman, Rest Assured
 - Experience in management tools: Jira, Trello, Microsoft Azure
 - Experience in SVC: Github, Gitlab
 - Experience in CI tools: Jenkins, Gitlab-CI
 - Experience with SQL: MySQL, SQL Server
 - Experience using the following IDEs: VS Code, Eclipse, and IntelliJ
 - Knowledge of web application technologies: HTML, CSS
 - Exposure to programming languages: Javascript
 - Exposure working in automation testing frameworks: Playwright, Cypress
 - Exposure to automation testing on mobile apps: Appium
 - Exposure to performance testing: Jmeter
- **Manual Testing Skills:**
 - Software testing process: Agile/Scrum
 - Testing method: Black Box Testing
 - Testing level: Integration Testing, System Testing, Acceptance Testing
 - Testing objective: Regression Testing

EXPERIENCE

TMA Solutions

Automation Tester & Manual Tester

March 2021 - April 2023 | Ho Chi Minh - Vietnam

Titan Technology

Automation Tester

April 2023 - Jan 2024 | Ho Chi Minh - Vietnam

Rainscales

Middle Automation Tester

Jan 2024 - Present | Ho Chi Minh - Vietnam

Responsibilities:

- Understand the new feature/ functionality defined in the product requirement by the Product Owner and define the test scope required through the release testing process
- Discuss, develop, and review test cases with the Development Team
- Define and develop the automation framework for API, Functional UI, and GUI Testing
- Design, implement, and execute automation scripts
- Configure Jenkins jobs to run smoke test-suits, regression test-suits and generate report as well
- Attend daily stand up and every meetings in the sprint (sprint planning, SU, sprint retro, ...)

RELEVANT PROJECT

FOUNDU (TMA)

- The cloud-based, HR technology solution platform – foundU facilitates HR functions associated with the recruitment and payment of employees.
- Role: Manual Tester
- Responsibility:
 - > Working with both API and UI testing
 - > Working closely with the developer team and customer to clarify the requirements
 - > Investigating requirements and designing test cases
 - > Executing functional tests, system tests, and regression tests
- Technologies: Manual testing skills, Postman, Amazon Workspace, Jira,...

KBTG – KASIKORN BUSINESS TECHNOLOGY GROUP (TMA)

- KBTG constructed a website for Kasikorn Bank. This project provides solutions to manage customers and their transactions, as well as relevant operations.
- Role: Automation Tester
- Programming language: Robot Framework based on Python
- Responsibility:
 - > Working closely with the manual team, developer team, and customer to clarify the requirements
 - > Defining and developing the automation framework
 - > Designing, implementing, and executing automation scripts in local as well as on CI/CD
- Technologies: Robot Framework, Jenkins, Gitlab, Jira, Grafana,...

SOLUTION FOR HUB24 (TMA)

- HUB24 is the E-commerce website for buying and selling electronics and consumer goods
- Role: Fullstack Tester (50% Manual Testing + 50% Automation Testing)
- Programming languages: Java
- Responsibility:
 - > Designing and executing functional tests, system tests, and regression tests
 - > Working closely with the developer team, and customer to clarify the requirements
 - > Designing, implementing, and executing automation scripts in local and on Jenkins
 - > Generated report for team and client via Allure report
- Technologies: Java Selenium, Maven, Allure Report, Jenkins, Github,...

AUVERNIR (TITAN TECHNOLOGY)

- Avenir is an intelligent, cloud-based client engagement platform that enables firms to leverage the best of today's technology to create a better engagement experience for practitioners and their respective clients
- Role: Automation Tester
- Programming languages: Java
- Responsibility:
 - > Designing and executing functional tests, system tests, and regression tests
 - > Working closely with the manual team, developer team, and customer to clarify the requirements

- > Designing, implementing, and executing automation scripts in local and on Jenkins
- > Generated report for team and client via Allure report

- Technologies: Tosca, Java Selenium, Maven, Allure Report, Jenkins, Microsoft Azure,...

FREIGHT-VERIFY (RAINSCALES)

- FV is a real-time visibility platform for complex supply chains that integrate with customers' existing supply chains at the enterprise level and track everything in real-time for true end-to-end results – providing ETA prediction, on-time performance measurement, business intelligence, reporting and analysis.

- Role: Automation Tester

- Programming languages: Java

- Responsibility:

- > Designing and executing functional tests, system tests, and regression tests
- > Working closely with the developer team, and customer to clarify the requirements
- > Designing, implementing, and executing automation scripts in local and on Jenkins
- > Generated report for team and client via Allure report

- Technologies: Java Selenium, Rest Assured, Maven, Jenkins, Postman, Jira, ...

EDUCATION

CAN THO UNIVERSITY – CAN THO, VIETNAM

General Medicine

APTECH SCHOOL – HO CHI MINH, VIETNAM

Advanced Diploma In Software Engineer

CERTIFICATION
