Bio: data analysts in financial industry with +10 years experience

PROFESSIONAL EXPERIENCE

Raiffeisenbank | Lead Data Analyst, Individual Contributor, Full-time (Jul 2023 – present, 9 mon.)

AO Raiffeisenbank is a bank in Russia. It is a subsidiary of Raiffeisen Bank International, which in turn is a fully controlled subsidiary of Austrian banking group Raiffeisen Zentralbank.

- Development of operational analytics for credit products in cooperation with the product managers (dashboards, scripts).
- Development of channels for delivering analytics to users (chat bots, newsletters).
- Research for insights and areas for optimization in processes.
- *Stack*: Python (pandas, matplotlib, scikit-learn), SQL, PowerBI

Sber | Lead Data Analyst, Team Lead, Full-time (Jul 2019 – Jul 2023, 4 yrs.)

Sber is the largest bank in Russia (~40% market share) as well as a big technology company. It is focused on building a data-driven financial ecosystem. As a Data Analyst, I do research to find insights.

- Distribution of process mining technology in the Bank's corporate departments: provide data-driven analytics for optimising business processes. As a result, reduced costs by several hundred million rubles.
- Participation in application of machine learning: predicting processing time, anomaly detection, clusterization. As a result, improved business processes and increased customer satisfaction index.
- Team leading: preparing specialists from young team members. Our team is one of the best analytical teams according to the results of an internal corporate headquarters poll 2021.
- *Stack*: Python (pandas, matplotlib, scikit-learn), SQL, PowerBI, Tableau, Qlik Sense, ML/AI

Deloitte | Senior consultant, Full-time (Oct 2013 – Jun 2019, 5 yrs. 7 mos.)

Deloitte is a multinational professional services network (Big 4) with offices in over 150 countries around the world. Deloitte provides audit, consulting, financial/risk advisory, tax and legal services. There are a lot of "Thank you!" letters from Deloitte during my working career.

- Leading of project teams of 2-3 consultants and providing legal analysis of corporate tax and transfer pricing matters (audit, due diligence, consulting)
- Development of various (over 10) automated analytical software tools in the field of taxation including fin models (determination of various tax consequences) and converters (from excel files to XLM/JSON).
- Establishment and maintenance of client network.
- Conducting training on analytics for Deloitte staff (Excel and methodology of analysis).
- *Stack*: VBA, Excel, Google Script, Delphi

EDUCATION

Gubkin University

- Master of Management, with honours, 2011-2013 (focus on financial modelling)
- Specialist in Law, with honours, 2009-2012 (focus on legal logic)
- Bachelor of Economics, with honours, 2007-2011(focus on statistics and econometrics)
