OBJECTIVE

Dynamic Frontend Developer and Project Manager bringing specialized expertise in developing scalable web applications and enhancing user engagement, with a deep focus on modern technologies like React, Svelte, and Next.js to drive impactful business outcomes.

SKILLS

- **Languages:** JavaScript, TypeScript, Java, Python, Haskell
- **Frameworks/Libraries:** React, Svelte, Next.js, Angular, Node.js
- **Frontend:** HTML5, CSS3, SASS, SCSS, Tailwind, Bootstrap
- **Tools & Platforms:**
    - Version Control: Git, GitHub, GitLab
    - Build & Deployment: Webpack, Vite, Jenkins
    - Containerization & Virtualization: Docker
    - Cloud Services: AWS (RDS, EC2, Lambda, S3, IAM, VPC)
- **Design & Prototyping:** Figma, Zeplin
- **Methodologies:** Agile, Scrum
- **Soft Skills**: Project leadership, Problem-solving, Effective communication, Time management

EXPERIENCE

Project Manager/Lead Developer *(September 2022 – Present)*   **Silhouette Miami (Remote)**
- Spearheading the development of a scalable, user-centric e-commerce platform, using PostgreSQL, AWS S3, AWS RDS, and Cloudflare to enhance site performance and security.
- Implemented a comprehensive blog to boost organic traffic, integrating SvelteKit and SCSS for front-end development, and leveraging GitHub Actions for CI/CD to streamline updates.
- Utilizing Figma for UI/UX designs, ensuring responsive and optimized user experiences across all devices.
- Projected to triple the company's client base through strategic enhancements to online visibility and user engagement.

Frontend Svelte Developer *(June 2023 – Jan 2024)*   **DILIGENTLY AI (Remote)**
- Optimized authentication processes to reduce load time by 80%, from 10 seconds to 2 seconds, using SvelteKit and Tailwind CSS.
- Implemented Swagger for API documentation, ensuring effective communication and integration with backend services.
- Delivered high-quality updates under tight deadlines, enhancing application reliability and performance.

Lead Frontend Developer *(June 2021 – March 2022)*   **ARCHIVS (Remote)**
- Developed a 'link-in-bio' web application from inception to deployment, enhancing user engagement through meticulous UX/UI design using Next.js, GraphQL (Apollo), and Framer Motion.
- Integrated analytics to optimize content strategies, significantly improving engagement metrics and user interaction.
- Managed application hosting and deployment using Vercel, ensuring high availability and scalability.

Full Stack Developer *(May 2021 – August 2021)*   **SUMMITWORKS (Remote)**
- Engineered and maintained microservices and cloud applications using Spring Boot, enhancing system scalability and performance.
- Developed robust front-end features using Angular and TypeScript, integrating RxJS for reactive programming.

- Managed AWS infrastructure elements including RDS, Lambda, and EC2, ensuring robust, scalable cloud solutions.
- Implemented continuous integration with Jenkins and version control with GitHub, optimizing development workflows.

Frontend React Developer Intern *(February 2021 – August 2021)*   **REIFORM (Remote)**
- Developed and deployed responsive web applications, improving the company's digital presence and user engagement.
- Collaborated with backend teams using React, TypeScript, and AWS Cognito, facilitating seamless feature integration.
- Participated in agile development processes, enhancing team productivity and project management.

PROJECTS

Portfolio Website   **(In Progress)**
Personal
- Creating a portfolio site to display front-end projects, showcasing skills in React, Svelte, and Next.js, with a focus on user-centered design and interactivity.

Tasque: Personal Task Management Application   **(In Progress)**
Personal
- Sole designer and developer of "Tasque," a task management app leveraging Electron and Svelte for a cross-platform experience.
- Features include task lists, bullet journal entries, kanban boards, and sticky note boards, aimed at enhancing personal productivity.
- Exploring the potential to make "Tasque" open source to contribute to the developer community.

E-Commerce Platform Development   **(In Progress)**
Silhouette Miami
- Directing the launch of a cutting-edge e-commerce platform, integrating a content-rich blog to drive additional traffic and engagement.
- Anticipated to triple the company's client base by leveraging strategic online marketing and engagement tactics.

HALite: Data Analysis Tool For Environmental Chemistry
Reiform
- Made the UI for widget-based chemistry data analytics.
- Used a REST API to pass data from the server about the widgets being used and their positioning on the UI.
- Websockets used for real time collaboration on projects.

'Link-in-Bio' Web Application
ARCHIVS
- Led the creation of a platform allowing influencers to design their pages, enhancing engagement through a user-friendly and customizable interface.
